

## Product List – ShepCo™ Cobalt Salts

Shepherd Widnes Ltd is one of the world's foremost producers of inorganic cobalt salts.

From our manufacturing site in the UK, we can supply the full range of cobalt salts manufactured to the highest quality and standards.

Shepherd Widnes Ltd is ISO 9001 & ISO14001 registered and is also a FEMAS approved manufacturer.

### Available Grades

#### Cobalt Acetate

ShepCo™ Acetate FG	-	a grade suitable for use in the animal feed industry.
ShepCo™ Acetate PET	-	a grade suitable for use in the PET industry.
ShepCo™ Acetate PTA	-	a grade suitable for use in the PTA industry.
ShepCo™ Acetate TG	-	a grade suitable for a wide range of chemical applications.
ShepCo™ Acetate TG (sol)	-	a solution grade suitable for a wide range of chemical applications.

#### Cobalt Carbonate

ShepCo™ Carbonate FG	-	a grade suitable for use in the animal feed industry.
ShepCo™ Carbonate CTG	-	a grade suitable for use in the catalyst industry.
ShepCo™ Carbonate TG	-	a grade suitable for a wide range of chemical applications.

#### Cobalt Chloride

ShepCo™ Chloride TG	-	a grade suitable for a wide range of general purpose applications.
ShepCo™ Chloride TG (solution)	-	a solution grade suitable for a wide range of chemical applications.

#### Cobalt Hydroxide

ShepCo™ Hydroxide TG	-	a grade suitable for a wide range of general purpose applications.
ShepCo™ Hydroxide CXG	-	a grade suitable for use in the paint industry.

#### Cobalt Nitrate

ShepCo™ Nitrate TG	-	a grade suitable for a wide range of chemical applications.
ShepCo™ Nitrate TG (solution)	-	a solution grade suitable for a wide range of chemical applications.
ShepCo™ Nitrate GTL	-	a grade suitable for use in the petroleum industry.

#### Cobalt Sulphate

ShepCo™ Sulphate FG	-	a grade suitable for use in the animal feed industry.
ShepCo™ Sulphate TG	-	a grade suitable for a wide range of chemical applications.
ShepCo™ Sulphate TG (solution)	-	a solution grade suitable for a wide range of chemical applications.

#### Cobalt Oxide

ShepCo™ Oxide 45FR	-	a grade containing a minimum of 45% cobalt.
ShepCo™ Oxide 70CF	-	a grade containing a minimum of 70% cobalt.
ShepCo™ Oxide 70CFG4	-	a grade containing 70-71% cobalt, with an extra fine particle size.
ShepCo™ Oxide 70CN	-	a grade containing 70-71% cobalt, with a normal particle size.
ShepCo™ Oxide 71CF	-	a grade containing 71-72% cobalt, with a fine particle size.
ShepCo™ Oxide 71CFG4	-	a grade containing 71-72% cobalt, with an extra fine particle size.
ShepCo™ Oxide 71CN	-	a grade containing 71-72% cobalt, with a normal particle size.
ShepCo™ Oxide 72CF	-	a grade containing 72-73% cobalt, with a fine particle size.
