

Product Data Sheet

SHEPCO™ CARBONATE

Cobalt Carbonate ($2\text{CoCO}_3 \cdot 3\text{Co}(\text{OH})_2 \cdot \text{H}_2\text{O}$) is a product that is widely used in the ceramic, catalyst and animal feed industries. This range of products has a cobalt content of 50-52%.

CAS: 200 - 755 - 8

Cobalt Carbonate - General Basic Monohydrate

EINECS: 208 - 169 - 4

Cobalt Carbonate - General Basic Monohydrate

Available Grades

Catalyst Grade (CG)

This grade has low impurities for optimum performance in catalyst applications. Its high cobalt content makes it easy to handle with less dust and foam generated when used in catalyst production.

Feed Grade (FG)

This grade has low levels of Cd, Pb, As and Hg for Animal Feed Applications. Shepherd has FEMAS approval for the manufacture and supply of Animal Feed products and FEMAS has been granted equivalence with all the major European feed ingredients standards.
