

Product Data Sheet

SHEPCO™ HYDROXIDE

Cobalt hydroxide ($\text{Co}(\text{OH})_2$) is a product that is widely used in the ceramic, paint, drier and catalyst industries. This range of products has a cobalt content of 61 - 62%.

CAS: Cobalt Hydroxide 21041 - 93 - 0
EINECS: Cobalt Hydroxide 244 - 166 - 4

Available Grades

Carboxylate Grade (CXG)

A carboxylate grade cobalt hydroxide, which has been specially designed to maximize cobalt yields and filtration time when used in the manufacture of carboxylate driers and rubber adhesion promoters.

Technical Grade (TG)

A technical grade cobalt hydroxide, which has been specially designed as a high purity product with low impurities such as nickel, manganese, and zinc. This makes it suitable for use in a wide range of applications, including the manufacture of catalysts, paints, ceramics and pigments.
